

In *HUNTED*, Caitlyn is a telepath—she can hear other people’s thoughts, and can make other people hear her thoughts. No one can keep secrets from her!

If you had a paranormal talent, what would you want it to be? (You can select multiple answers if you want to.)

Telepathy—be able to hear other people’s thoughts, and talk with other paranormals mind-to-mind without anyone else hearing. So you could hear others’ true thoughts if you asked them a question, or even hear their memories or secrets. And with another telepath you could have secret conversations even in class that no one else would hear.

Telekinesis—be able to move objects with your mind. So you could tidy up your room without getting up and touching anything, or get yourself a snack from the kitchen without getting up.

Teleportation—be able to move through space just by visualizing it. So if you were powerful enough, you could be in New York and visualize being in Florida, and there you’d be. Or after school you could imagine yourself home, and you’d be home without having to take the bus or walk there.

Precognition—be able to know or predict future events before they happen. So you could warn someone you care about before something bad happened, and help them avoid it.

Astral Travel—be able to travel great distances quickly with your soul, able to hear and see things without anyone seeing you're there. So you could listen in on your parents talking at work or downstairs in the kitchen without them knowing you're there.

Postcognition—be able to see and hear events after they've happened. So you could know whether someone accused of stealing something really did steal or not.

Medium—be able to talk with the dead. So if you were powerful enough, you could talk to someone you love who's passed. Or you might end up talking with someone you don't even know.

Empath—be able to feel the emotions of a person, place, or object. So you could know what someone is really feeling even if they're trying to hide it.

Psychometry—be able to pick up information from an object by touching it. So you could find out things about your best friend from her past, present, or even her future just by touching her watch. For some, it can also happen through skin contact.

Energy Healer—be able to heal people or improve their health by touch or over distance. So if someone you love had a serious disease or was wounded, you could help them reverse it.

Caitlyn, a telepath on the run from government troopers, must choose between staying in hiding to protect herself or saving the world.
